

Hydration and Growth (Classic Reprint)

Filesize: 9.6 MB

Reviews

A must buy book if you need to adding benefit. Better then never, though i am quite late in start reading this one. I am very happy to inform you that this is basically the very best book we have study during my own life and could be he finest ebook for possibly.

(Rodger Hane)

HYDRATION AND GROWTH (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Hydration and Growth Three main conceptions concerning growth and its developmental aspects in plants are to be met in the history of physiology in the half century beginning with the researches of Sachs and his school. The first or earliest, that of special stuffs or substances necessary for the initiation of growth and differentiation of various organs, especially for the origination and development of reproductive organs, is now giving way to the modern conclusion that formative material as such has no actual existence in fact and no good basis in theory. The present trend of thought leads to the assumption that growth proceeds from and depends upon states or combinations of material or accumulations in connection with living matter rather than upon any special constructive stuff or substance. This may also be held to apply to hormones, vitamins, and other symbolic expressions for combinations of material necessary for initiating and maintaining development, reproduction, or growth. The second aspect of the subject is that which deals with the incorporation of new material in the cell and its subsequent distention by an osmotic mechanism, upon the basis of researches of Pfeffer and de Vries. The protoplast is dealt with as a sac. The products of the metabolic processes converge in the vacuole, which in consequence becomes the seat of osmotic forces and the center of the mechanism of distention. An important feature of this scheme of operation is an ideal semi-permeable membrane, not morphologically identifiable, internal to the cellulose wall or other durable and visible integument. The exploitation of the theory of permeability of this membrane has been carried out in such manner as to place undue...
