Houbolts First Crusade In his paper presented before the Society of Automotive Engineers, of all organizations, in April 1960, 41-year-old John Cornelius Houbolt focused on the problem of rendezvous in space, involving, for example, the ascent of a satellite or space ferry as to make a soft contact with another satellite or space station already in orbit. His analysis of soft rendezvous could have applied to a lunar mission, but the paper did not specifically refer to that 29 possibility. However, Houbolt already had been studying such an application. This was clear from the minutes of a meeting of Langley's Manned Space Laboratory Group on 5 February 1960, when Houbolt discussed the general requirements of a soft landing device in a lunar mission involving lunar-orbit rendezvous. This discussion took place even though that particular rendezvous committee was supposed to focus more narrowly on reaching and leaving an Earth-30 orbiting space station. John C. Houbolt at the time of the lunar-orbit rendezvous debate. From this point...
