RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Portland, OR : U. S. Dept. of Agriculture, Forest Service, Pacific Northwest Research Station, 2007 OCLC Number: (OCoLC)144810475 Subject: Marbled murrelet -- Monitoring -- Pacific States. Excerpt: . . . Regional Population Monitoring of the Marbled Murrelet: Field and Analytical Methods line (by using a trigonomic calculation to obtain the distance). Although estimates were found to be negatively biased, the direct estimate of perpendicular distance was more precise. Raphael and Laake (2000, available from the senior author on request) documented the full set of steps necessary to configure program DISTANCE for analysis of data to compute a detectability function using this design. Observer Methods We conducted a number of tests to determine whether to use one or two observers to record murrelet observations (<http://www.reo.gov/monitoring/murrelet/pdf/pnwatsea.pdf>, Evans Mack et al. 2002). We obtained more accurate results from two observers than from one observer, especially when bird density was high and in wind conditions that generated wind wavelets. Under these conditions, single observers missed a higher proportion of birds close to the line...

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- Prof. Arlie Bogan

It is in a single of the best book. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dr. Barney Robel Jr.
